DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1-5, 12-14, 24 and 25 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Schultz et al. (USP 6,525,516). Schultz (see figure below) discloses a voltage regulator (10), a two-sense locations (80 and 82) on the electrical component/ motherboard (14). It is clear that the controller receives these two feedback signals and adjusts the voltage regulator based on the combination of the feedback signal.

Art Unit: 2838

3. Claims 6-11, 15-23, 26-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schultz et al. (USP 6,525,516) and further in view of Dinh (USP 6,262,566). Schultz et al discloses the claimed invention (see paragraph 2), Dinh discloses that it is known in the art to provide the use of transient type filters for the feedback signal. It would have been obvious to one having ordinary skill in the art at the time of the invention was made to provide the use of transient type filters for the feedback signal of Dinh with the system and method for a dual voltage sensor Schultz et al. in order to provide a cleaner feedback signal for a more precise control of the output voltage.
